OUR ADVANCED COURSES

Advanced Training with APA
Accreditation

- Quality Control.
- Validated Polygraph Techniques
- Interview and Interrogation.
- PEACE Protocol.
- Physiology for Polygraphists
- Criminal Psychology
- Risk Assessment
- Validated Scoring Systems (ESS, ESS-M. 7 & 3 positions).
- Countermeasures.

Courses, 12 Countries

Our Academic Division, International Polygraph Studies Center (IPSC), is an internationally accredited training unit. We are certified by the American Polygraph Association (APA) and the American Association of Police Polygraphists (AAPP). Our practice standards are regulated by internationally accredited principles and validated by scientific research.

Our school has trained more than 4000 students from different countries.

IPSC conducts continuous scientific research. Our publications and contributions to our profession keep us in the forefront of our profession.

Polygraph is a developed science. Specialized training is necessary for professionals who are seeking a career in this field. The laws of this science will be applied in order to conduct both Diagnostic (Investigation) and Screening (Human Resources) in both the public and private sectors.

IPSC is proud to present a training curriculum of the highest standard and we are committed to delivering the best practices of PDD science.

IPSC instructors have up to 20 years experience in:

- Psychophysiological Detection of Deception (PDD)
- · Creation of polygraph units
- Training for professional polygraphists worldwide
- Speaking at International and Scientific Congresses
- Producing validated research, published in indexed journals.

Risk Assessment

The process of trust control requires scientific evidence of risks. As it is a critical element within organizations, the study is carried out through effective processes and strategies.

INDIVIDUAL

- 1. What is being evaluated and why?
- 2. Recommended topics in the investigation of risk behaviors
- 3. What characteristics a behavior has to have to be considered a risk?
- 4. What are the objectives and proven indicators that allow establishing a risk?
- 5. Which are considered risk indicators in terms of probability, consequences, immediacy, escalation and frequency?
- 6. Probability and Level of Risks
- 7. The components of the risk assessment: Static, Dynamic and Acute Factors

Countermeasures

INDIVIDUAL

- Types of Countermeasures (CM'S) applied in the Psychophysiological Detection of Deception (PDD).
- 2. Anti-Countermeasures (ACM)
- 3. Counter- Countermeasures (CCM).
- 4. Chart scoring of CM's Countermeasures

It recognizes the typical patterns of respiratory, electro dermal and cardiovascular manipulation. Effectively applies prevention strategies during the pretest, test and post-test.

Polygraph Basic Course

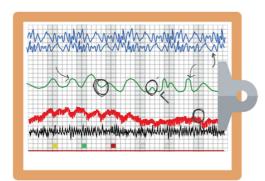

GROUP

INDIVIDUAL

- 1. Law and Human Rights
- 2. Ethics of the APA procedural rules and regulations.
- 3. Introduction to the history and evolution of the psycho-psychological detection of deception.
- 4. Scientific tests: operating mechanics.
- 5. Polygraph techniques
- 6. Pre-test interview
- 7. Post-test interview
- 8. Psychology
- 9. Physiology
- 10. Test question construction
- 11. Analysis of test data
- 12. Countermeasures
- 13. Information and report of results
- 14. Practical application of polygraph
- 15. Education and optional training

Our graduates from the Polygraph Basic Course are highly qualified in the field application of polygraph, risk factor assessment, forensic evaluations, using polygraph as a tool for decision making.

Quality Control

GROUP

INDIVIDUAL

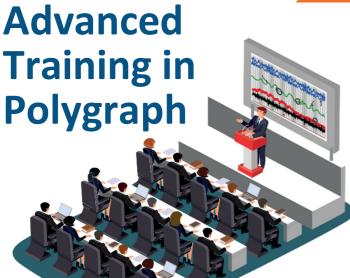

- 1. Validated International Protocols
- 2. Terms of Reference
- 3. Documental Analysis
- 4. Analysis of QC in phases
- 5. QC Reporting

It is essential to guarantee that the results obtained are in accordance with the best practices and Quality Control, thus allowing us to establish that the polygraphist has carried out their work in accordance with internationally validated standards.

GROUP

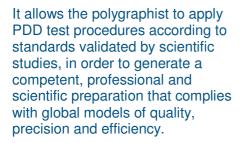

INDIVIDUAL

Polygraph professionals are required to attend advanced training seminars to keep them informed of new research and new polygraph techniques in order for them to provide the best service to their institutions and society in general.

- Selection of objectives, Pretest interview Sequence and methodology based on validated principles.
- Validated protocol to determine the psychophysiological suitability of the evaluated.
- Development of relevant questions through concept maps.
- 4. Development of DLC and PLC.
- 5. Advanced Training validated Polygraph Techniques. Screening and Diagnostic Tests (Meta-Analysis).
- Concepts and advanced principles in the analysis of graphs. 7 positions and ESS algorithms.
- Reporting model under a certified standard in which the confidence levels of the test results are reported.
- Polygraph CM'S

Polygraph Techniques

GROUP

INDIVIDUAL

- Validated protocols for the construction of test questions
- Pretest procedure, presentation of relevant questions through concept maps and DLC / PLC
- Validated Polygraph Techniques (screening and diagnostic)
- Manual and algorithmic chart scoring systems
- 5. Examinee Suitability
- 6. Quality Control Validated Procedure
- 7. Polygraph CM's

Interview and Interrogation

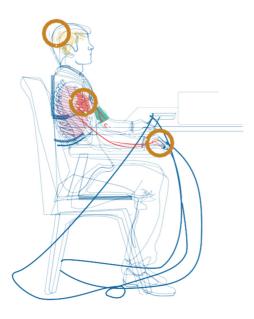

A good interviewer should use specific procedures to correctly assess the risk, obtain the most information possible and advise the decision maker.

GROUP

INDIVIDUAL

- 1. Introduction: persuasion, negotiation, and establishment of a working relationship.
- 2. Classification of interviews using legal, physical and cognitive strategies.
- Structured interviews.
- 4. Semi-structured interviews.
- 5. The investigative interview.
- 6. Interview protocols that increase the collection of information.
- 7. Detection of concealment and deception in interviews to obtain information.
- 8. Common mistakes in interviews with evasive people.
- 9. Management of interviewees based on characteristics of the personality.
- 10. Types of lies
- 11. Establishment of a route (validated interview procedures).
- 12. PEACE.
- 13. Cognitive interview.
- 14. Deception detection (validated cues of lie and truthfulness).
- 15. Destructive behavior or resistance.
- 16. Practical cases.

Physiology

GROUP

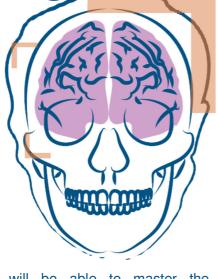

INDIVIDUAL

- 1. Introduction to Physiology and Anatomy
- 2.-Nervous System (microstructure)
- 3.-Nervous System (macrostructure)
- 4.-Integumentary System (Electro-dermal Activity)
- 5.-Cardiovascular System (cardiovascular registry)
- 6.-Anatomy of the Respiratory System (Respiratory Activity)

During a polygraph evaluation, physiological data is recorded, monitored and analyzed, which show differentiated activity during deception. It is necessary that the polygraphist has a good understanding of the theoretical foundations of physiological changes.

Criminal Psychology

The polygraphist will be able to master the theoretical concepts related to human behavior, which leads to committing a crime; addressing specific topics on Criminal Psychology.

GROUP

INDIVIDUAL

- 1. Definition
- 2. Explanatory theories of human aggression
- 3. Relationship between biology and criminal behavior
- 4. Relationship between the socio-family environment and crime
- 5. Explanatory frameworks of crime
- 6. Areas of application of Criminal Psychology
- 7. Elaboration of theories on crime
- 8. Victimization and social reaction
- 9. Police investigation
- 10. Prevention of crime
- 11. Forensic psychology

Interview and Interrogation PEACE Model

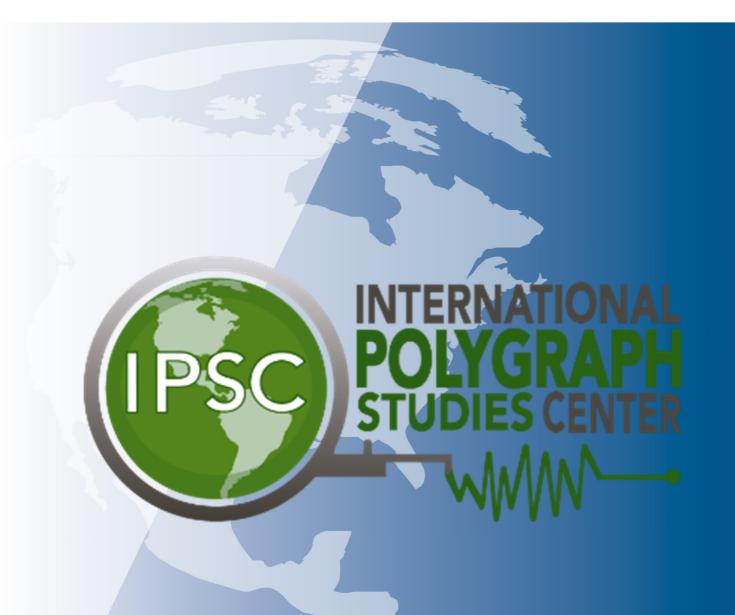

In many countries, the general way in which investigators have questioned suspects to obtain relevant information, is to assume a repressive or oppressive approach.

GROUP

INDIVIDUAL

- 1. Coercion
- 2. Available Guides
- 3. Public Opinion
- 4. Interviewer
- 5. Confrontation
- 6. What is PEACE?
- 7. Victimization and Social Reaction
- 8. Abilities which made the difference
- 9. The Effect on Confessions
- 10. Suspects of Terrorism in Real Live
- 11. United Nations Special Rapporteur
- 12. Strategic Use of Evidence
